

INDUSTRIAL DRY CLEANING MACHINE

P1000

P1400

Features and Benefits:

- Fully enclosed design with high efficiency recovery system ensure maximum recovery of Perchloroethylene solvent to reduce operation cost in long term
- Automatic programmable computer control with self-diagnostic feature allows flexible operation needs and easy trouble shooting
- Frequency inverter drive enable variable speed setting for different garments
- Major parts in stainless steel including solvent tank, inner basket, outer drum, recovery air duct, button trap, condenser, still tank, water separator, filters, etc...
- Standard 3 tanks with self-cleaning sight glass
- Double distillation tanks with automatic cleaning system for fast distillation process
- Smart dry controller gives accurate control to saving drying time and energy
- Thermostat controlled cooling water regulator minimize water usage
- Safety door lock mechanism for all loading door, button trap door, still door, lint filter door give maximum protection to operator
- Double water separator allows better separation to recover more solvent from water
- Automatic lint cleaning system
- Automatic soap dosing unit
